

Incident Response Plan

Incident Response Plan

- > Version: 2026.0, Site Reliability Engineering
- > This plan defines how the company detects, escalates, and resolves incidents. It applies to all customer-facing services.
- 1. Severity Classification
 - 1.1 SEV-1 (Critical): complete service outage or degradation for more than 60 minutes.
 - 1.2 SEV-2 (Major): significant degradation affecting a large number of users; response time: 30 minutes.
 - 1.3 SEV-3 (Minor): partial degradation with a workaround available; response time: 4 hours.
 - 1.4 SEV-4 (Cosmetic): non-functional issues. Response time: 24 hours.
- 2. Escalation Chain
 - 2.1 Escalation order: on-call engineer, team lead, manager, director.
 - 2.2 Each escalation adds 15 minutes to the response time.
 - 2.3 If the on-call engineer does not acknowledge within 15 minutes, the incident escalates automatically.
- 3. Post-Incident Review
 - 3.1 Every SEV-1 and SEV-2 incident requires a post-mortem meeting within 5 business days.
 - 3.2 The review must produce action items with owners and due dates.
 - 3.3 Action items are tracked until closure; overdue items are escalated to the engineering manager.
- 4. Communication
 - 4.1 Status updates are posted to the status page every 15 minutes during incidents.
 - 4.2 A final incident summary is sent to affected customers once the incident is resolved.
- 5. Drills
 - 5.1 Chaos drills are run monthly against the staging environment.
 - 5.2 A full disaster recovery drill is conducted every 6 months, led by the SRE director.
